

I am very happy with the Indiana Telephone Privacy law and do not want a federal law preempting it. We almost had to change our phone number that we had for 18 years because we received so many unwanted calls. The Indiana law is great! We can actually eat a meal without 3-4 calls from people we don't want to talk to. I do not want to hear from a credit card company that I quit using 10 years ago! There is a reason I chose another one and I don't want to be harassed about it. Please consider my rights when deciding this issue. Thanks you.
